ACCESS SERVICES TARIFF

SECTION 3 – SWITCHED ACCESS SERVICE, (CONT'D.)**3.2 Manner of Provision**

- 3.2.1** Switched Access Service is furnished for originating and terminating calls by the Customer to its End User. Switched Access Service is furnished on a per-line or per-trunk basis.
- 3.2.2** Originating traffic type represents access capacity within a LATA for carrying traffic from the End User to the Customer; and Terminating traffic type represents access capacity within a LATA for carrying traffic from the Customer to the End User. When ordering capacity for Switched Access Service, the Customer must at a minimum specify such access capacity in terms of originating traffic type and/or terminating traffic type.
- 3.2.3** Feature Group Access is provisioned, at minimum, at the DS-1 level and provides line-side or trunk-side access to End Office switches, for the Customer's use in originating and terminating communications. Basic Switched Access service will be provided with Multi-Frequency In Band Signaling (SS7 is also available, where capabilities exist).
- 3.2.4** Two types of Feature Group Access are available:
- A.** Tandem Connect Access: This option applies when the customer has no direct facilities to the Company's End Office. Traffic is routed to and from the End Office via the Access Tandem. Delivery of calls to, or acceptance of calls from, the Customer's End User location(s) via Company-provided Tandem Connect Access services shall constitute a Constructive Order and an agreement by the Customer to purchase the Company's switched access services as described and priced herein.
 - B.** Direct Connect Access: This option applies when the Company or another service provider provides dedicated facilities between the Customer's premises and the End Office. This transmission path is dedicated to the use of a single Customer. The Company requires the Customer to submit an ASR or comparable documentation for the dedicated portion of Direct Connect Access. The dedicated portion of Direct Connect Access is provided on an Individual Case Basis as Special Contracts, Arrangements and Construction pursuant to Section 5 of this tariff.

ACCESS SERVICES TARIFF

SECTION 5 - SPECIAL CONTRACTS, ARRANGEMENTS AND CONSTRUCTION, (CONT'D.)

5.4 Special Construction Charges, (Cont'd.)

5.4.3 Termination Liability

- A. To the extent that there is no other requirement for use by the Company, a termination liability may apply for facilities or services specially constructed at the request of the Customer.
- B. The termination liability period is the estimated service life of the facilities provided.
- C. The amount of the maximum termination liability is equal to the estimated cost for installation and operation of the service during its service life. Costs include those items previously listed in Section 5.4.2.
- D. The applicable termination liability will be calculated based on the following:
 - 1. Multiplying the sum of the amounts determined as set forth in Section 5.4.3.C preceding by a factor related to the unexpired period of liability and the discount rate for return and contingencies.
 - 2. The amount determined in 5.4.3.D.1 preceding shall be adjusted to reflect the predetermined estimate of net salvage, if any, including any reuse of the facilities provided.
 - 3. The final termination liability is then adjusted to reflect applicable taxes or regulatory fees.
